Taylorcraft Restoration Workshops

Website: www.dekle.net/AAA/

Core team:

Project Manager---Bob Leyner 303-931-3867

Team members:

Jim Denly

Jack Greiner 303-709-6203

Carol Leyner

Mike Gugeler 720-890-0552

Georg Becker 303-652-2054

Last Workshop on the 6th of March 2010:

- **It is my understanding that there were about seven youth from On Laughter's Silver Wings in Denver attending and digging into the efforts.**
- **There was the usual group sorting out the fuselage details.**

Next Workshop on the 20th of March 2010:

- **Continuation of the fitting of wood fairings and floorboards to the fuselage.**
- **Some rebuilding of the LH wing leading edges to place the joints over ribs. This may require relocating some ribs.**
- **If we arrive at a cost for the engine core the engine assembly could begin-probably identifying pieced we need to replace to achieve a certified overhaul.**
- **The routing of control cables and wires in the wing and final fitting of the wingtip bow could also be on the do list**
- **We have the spars for the RH wing ready and the area for building the RH wing and placement of ribs could be set up.**
- **EAA chapter 43 will bring some rib building kits and Ch 43 may provide some help for kids to build sample ribs for this year's Air Venture**

We need additional Technical leaders to oversee various portions of the Taylorcraft rebuild and assist in gathering the needed background data that we are sorely lacking and aid in planning the workshop tasks! Folks like Steve Green that have or have had Taylorcraft projects would be of great help!

The weather may not be optimum so dress accordingly. The weather will limit some of the work (painting etc.) that we need to get done.
