

Antique Airplane Association of Colorado

Taylorcraft Restoration Workshops

Website: www.dekle.net/AAA/

Core team:

Project Manager---Bob Leyner 303-931-3867

Team members:

Jim Denly

Jack Greiner 303-709-6203

Carol Leyner

Mike Gugeler 720-890-0552

Georg Becker 303-652-2054

A reminder:

Neither the Antique Airplane Association of Colorado nor the owners of Antique field organize, control or provide airplane rides or flight instruction!!!

Any airplane rides or instruction are a private arrangement between the pilot and the passengers--_NO Exceptions.

Last Workshop on May 9th :

- **Work proceeded on the LH wing in the aileron cove and wingtip areas.**
- **The wing attach fittings were bolted to spars.**
- **The RH aileron assembly continued with the nailing of the ribs to the spar.**
- **Blanks were cut out for the wing attach brackets for the RH wing.**

Next Workshop on May 16th :

Carol & Bob Leyner will be at Platte Valley for their WWI aviation event (www.lafayettefoundation.org) .

- The emphasis will be:
- Installation of the LH wing tank.
- Installation of the aileron cove.
- Final trimming of the outer ends of the spars .
- Alignment checks of the aileron pivots.
- Installation of the fuselage tank.
- Installation of the cables and pulleys in the fuselage.
- Welding of the RH brake pedal bracket to the fuselage?

The wing and fuselage are slowly taking shape.

We have had tires donated by JD Gleitz , wheels and brakes donated by Tom Melsheimer, and Steve Stearns donated new brake linings. Dave Fisher donated a copy of the newest FAA 43.113 Manual on Approved Methods. Dave had previously donated some new aircraft fasteners to the project.
