Core team:

Project Manager---Bob Leyner 303-931-3867

Team members:

Jim Denly

Jack Greiner 303-709-6203

Carol Leyner

Mike Gugeler 720-890-0552

Georg Becker 303-652-2054

The crankcase has been machined and inspected returned to us.

Next Workshop on 18 June 2009 10AM to 3 PM :

The emphasis will as usual be:

- 1. Completion of the LH wing to prepare for leading edge installation and ultimately fabric covering.**
- 2. Getting the control column cabling installed and the remaining cables and pulleys in place**
- 3. With the control column in place the main fuel tank can be installed.**
- 4. Getting the RH brake pedal bracket welded in place.**

Anyone have some 4130 rod to bring?

- 5. Working on the new floorboards**
- 6. The tail surfaces and landing gear legs are covered and can be painted with “the Pink Stuff” and “the silver (fill coating stuff)” to get them closer to being ready for color painting. What color do we want?**
